取扱説明書

 **caution**

-For safe and correct use of this product, be sure to read and fully understand this manual before use.

- After reading this manual, be sure to keep it in the designated place so that you can use it at any time.

株式会社 **タイトー**®

May be done.

G2003038A

This time, Taito Co., Ltd. commercial amusement equipment, Thank you for purchasing "Buurix Diamond".
Thank you.

Purpose and handling of the instruction manual

This manual describes the handling method and precautions for handling this machine correctly. Please read this manual carefully and keep it in a safe place so that you can refer to it at any time. If you lose this manual, please contact the "Contact Information" listed in the "Repair Information" at the end of this manual.

About this product

This product does not come with an I / O board. Please manage it by purchasing the necessary optional items separately according to the game board to be used.

Fully compatible with NESiCAxLive

This product is a general-purpose chassis optimized for our content download system NESiCAxLive.

ネシカ クロス ライブ
NESiCAxLive

It is a content download system that distributes past titles and classic titles for free, including new titles. By using the touch-type NESiCA (common card) and adding his points to the player, it contributes to the improvement of repeatability.

About the person used in our amusement equipment

The person and meaning of the operator used in the amusement machine instruction manual are as follows.

● Store maintenance man

Experienced in the maintenance of commercial amusement equipment, and under the supervision of the owner of the commercial amusement equipment or the store operator, on a daily basis, the installation, assembly, maintenance and inspection of the amusement equipment, parts and consumables A person who exchanges.

● Technician

Amusement equipment manufacturer who is involved in equipment design, manufacturing, inspection, and maintenance services, or has the same knowledge of electrical, electronic, and mechanical engineering as graduating from technical high school, and is engaged in daily maintenance and repair of amusement equipment. The person involved.

● Player

A person who plays a game at a facility or store where commercial amusement equipment is installed.

Explanation of safety notations

In this manual, the degree of danger and damage caused by incorrect handling is classified by the following indications.

If you ignore this indication and handle it incorrectly, it may result in death or serious injury.

It indicates the contents that may cause injury and the contents that may cause property damage if this indication is ignored and the product is handled improperly.

Indicates precautions for instructing actions during work.
It shows the contents that are expected.

Indicates prohibition (what you must not do).

Handling precautions

- Do not use the product in an abnormal condition such as smoke, strange odor or abnormal noise. It may cause electric shock or fire. Immediately turn off the power switch, unplug the power plug from the outlet, and consult your dealer or our service department.
- The power capacity of this unit is AC100V and the maximum current consumption is 2.7A. Use indoor wiring that matches the power supply specifications as it may cause electric shock or fire.
- Do not insert or remove the power plug with wet hands. It may cause electric shock.
- Do not use a damaged power cord. It may cause electric shock or fire. Observe the following points when handling the power cord.
 - Do not process the power cord
 - Do not put heavy objects on the power cord.
 - Do not bend or pull forcibly
- The accessory power cord is for this unit only. Observe the following points when using the power cord. -Do not use the supplied power cord for other devices or applications.
- Do not wire the power cord by ridge. It will generate heat and cause a fire.
- Be careful when handling the power plug. Mishandling may cause a fire. Observe the following points when handling the power plug.
 - Do not insert the power plug with foreign matter such as dust attached.
 - Insert the power plug securely to the root.
- If liquid such as foreign matter or water gets inside, do not use it as it is. It may cause electric shock or fire. Immediately turn off the power switch, unplug the power plug from the outlet, and consult your dealer or our service department.
- Caution due to fire (cigarette) A fire alarm is not attached to this machine, so be careful not to let cigarette butts touch the machine.
- Please use only in Japan. This product is designed and manufactured for use in Japan. If it is used outside Japan, it may violate the laws and regulations of the country concerned, so it cannot be used outside Japan.

Important notice for safety

About warning labels

- Be careful of the lighting and dirt at the installation site so that the warning label affixed to the machine can be read sufficiently. Also, do not hide it with other game consoles.
- If the warning label becomes extremely dirty or damaged, replace it with a new label.
(Contact for inquiries regarding warning labels → end of book)

Control plate cover L (EG3) [E31 03014A] * Blindfold plate for mounting our control panel 	Stored in a cash box (EG3 = our product Eaglet 3)	1
Control plate cover R (EG3) [E31 03015A] * Blindfold plate for mounting our control panel 	Stored in a cash box (EG3 = our product Eaglet 3)	1
Locknut (U) (Trivalent W): M4 * For fixing EG3 and other companies' control panels 	Stored in a cash box (EG3 = our product Eaglet 3)	8
S PANEL HARNESS [L40 00169C] * For connecting other companies' control panels 	Stored in a cash box	1
Instruction sticker Sheet (remainder) 	Stored in a cash box	1

About various service keys

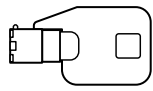

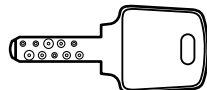

If you lose your service key, please contact the "Contact Information" at the end of the book.

■ **Service key: LY-1153**

It is a key for locking the ejector door, front door, and back door (lower).

■ **Cash key**

It is a key for locking the cash box.

Service key (LY-1153) 	2 pieces
Cash key 	2 pieces

■ 1-1. Moving the housing (moving the floor)

caution

- Store the power cord inside the housing before moving it.
- Please raise the adjusters (2 places) to the maximum before moving.

1

Open the ejector door, turn off the power switch, and unplug the power plug from the outlet.

2

Remove the fixing screws (3 places) on the back door (lower). Unlock with the service key, open the back door (lower), and store the power cord inside. [Trust screw (chrome): M4x8] 3 places

3

Before moving, raise the adjusters (2 places) with a monkey wrench etc., and the hole plugs (2 places) will be lifted and removed. Then raise the adjuster to the maximum.

* Be careful not to lose the removed hole plug.

重要

Give an adjuster
Then the hole plug comes off
Don't lose the plug
Please note.

4

Support the housing with both hands and push or pull at walking speed. You can also move it by holding the handle.

■ 1-2. Carrying the housing

caveat

- When carrying this machine (approx. 105 kg), be sure to carry the back with 5 or more people. Even if 5 or more people carry it, the balance may be lost due to floor conditions, etc., resulting in an accident or injury. Therefore, please work carefully.
- When carrying, never hold the resin part or control panel.
- This machine cannot be transported by forklift. Do not carry it with a forklift as it may cause an unexpected accident such as a fall.

■ Places you can't have

When carrying, do not hold the resin part or control panel.

■ Where you can have

Remove the instruction panel, hold the support position on the back with 5 or more people, and carry it slowly.

■ 1-3. Re-transportation method

caveat

This machine cannot be transported by forklift.
Do not carry it with a forklift as it may cause an unexpected accident such as a fall.

caution

- Be sure to attach accessories and instruction manuals before re-transporting.
- Remove the game board before re-transporting.
- Before re-transporting, fix the control panel vertically with the shipping shipping bracket.

- 1** Open the ejector door, turn off the power switch, and open the back door (lower).
- 2** Unplug the power plug from the outlet.
Bundle the cords and store them inside the back door (lower).
- 3** Open the front door and remove the game board.
- 4** Remove the control panel.
Install the control panel vertically using the shipping shipping bracket. [■ 4-7 Fixing the control panel assembly] → See page 65
- 5** Remove the instruction panel and return all accessories, such as the instruction manual, to their original storage location.
- 6** Make sure all keys are locked.
- 7** When moving the housing, raise the adjusters (2 places) with a monkey wrench, remove the hole plugs (2 places), and raise the adjusters (2 places) to the maximum.

* Please keep the removed hole plug in a safe place so as not to lose it.

■ 1-4. How to load the vehicle

caveat

This machine cannot be transported by forklift.
Do not carry it with a forklift as it may cause an unexpected accident such as a fall. ..

caution

- On the vehicle, lower the adjusters (2 places) of the housing and fix them firmly.
- Hang the rope on the shipping brackets (2 places).
- If the housing and rope come into contact with each other, use a cardboard box or the like to apply a pad. If you carry it without a pad, it may be damaged.
- Rope hanging is prohibited on the resin part.

1

[1-3. Re-transportation method → P14]Please refer to and prepare for re-transportation.

2

[1-1. Moving the housing (moving the floor) → P11]Refer to and move to the vehicle where you want to load the enclosure.

3

Load it on the vehicle and lower and fix all adjusters.

4

Hang a rope on the shipping bracket to fix it. Use cardboard or the like to cover the part where the rope comes into contact with the housing. Rope hanging is prohibited on the resin part.

Chapter 2 Installation

■ 2-1. Installation

• Installation conditions

**caveat**

● **Be sure to observe the following installation conditions.**

- Limited to indoors
- Ambient temperature is 5 °C ~ 35 °C
- Humidity is 10% to 70% and no condensation

• Places that cannot be installed

**caveat**

● **Never install it outdoors or in the following places.**

- Dangerous places for disaster prevention and the front of firefighting equipment
- Places where there is a risk of condensation due to rain leaks, water leaks, or humidity
- Near the indoor pool and shower
- Place exposed to direct sunlight
- Places exposed to direct heat such as heating appliances or places with strong heat
- Around flammable, highly volatile chemicals or dangerous materials
- Places with a slope on the floor (places with a slope of 2 degrees or more)
- A place with strong vibration
- Dusty place
- A place where the installation space cannot be protected

Installation space

A 500mm space is required on the front for the player's play space and maintenance work space. Please do not use this space as a passage. There is a power cord on the back, so make sure there is 100mm of space so that it does not get caught between the housing and the wall.

**Back-to-back installation**

When installing two housings for communication back to back, be sure to observe the installation dimensions shown in the figure below.

■ 2-2. Installation of housing

2-2-1 Fixing the housing

- 1 Bring this product to the installation location and lower the adjusters (2 places) using a monkey wrench so that the casters float 3 mm. After fixing, attach the attached hole plugs (2 places) and close the holes in the adjuster. * Be careful not to mistake the hole plug for the button cover.

重 要

Be sure to close the hole in the adjuster with a hole plug.

2-2-2 Assembling the control panel assembly

- 1** Loosen the bolts (2 places) on the upper side of the shipping bracket and remove the lower side (2 places). Lift the control panel assembly up and remove it.
After removing, remove the bolts (2) remaining on the back of the control panel assembly. [Sems Upset Bolt (W) (Trivalent W): M6x20] 4 places

- 2** Remove the shipping bracket bolts (2 places each) and remove the shipping brackets (2 pieces). [Sems Upset Bolt (W) (Trivalent W): M6x20] 4 places

重要

To Teku During transportation Must will be important, so when.

3

2 Temporarily fix the bolts (2) removed in step 1 to the positions shown in the figure.

4

Use the service key to unlock the key on the back of the control panel assembly and open the control panel toward you. Remove the screws (2 places) and remove the control cover (rear).

[Knurled screw with cross hole: M4x7] 2 places

5

3 Insert the notch hole of the control panel assembly into the head of the bolt temporarily fixed with, slide it toward you, and hook the control panel assembly with the bolt.

Tighten the temporarily fixed bolts, and then fix them with the bolts (2) that were removed.

6

Open the front door with the service key.

Fixed inside the front door[P4 / C]Remove the connector and JVS cable or LAN cable, pull it out from the hole in the control panel assembly, and secure it with a clamp. * Incorporates optional Burix JVS board or NESiCAXLive

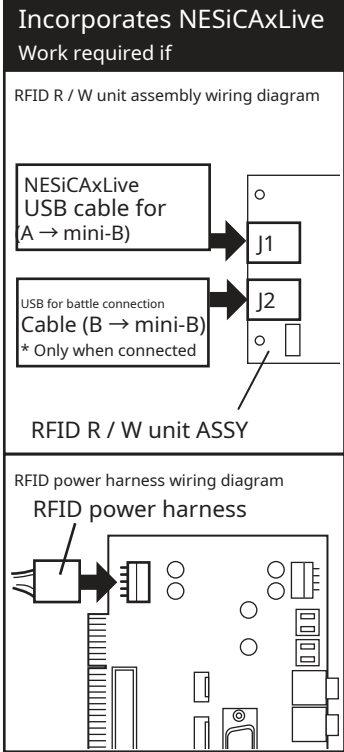

In that case, connect each connector as shown in the figure. * The X connector is not used, so do not remove it from the clamp.

HARD CANDY
 WWW.HARD-CANDY.COM キャンディ
 ハード

7 Control cover (rear) **4** Install with the screws removed in.
 [Knurled screw with cross hole: M4x7] 2 places

* If NESiCAXLive is installed, connect the USB cable to the control panel.
 Pull it out of the hole in the ASSY and connect it to the RFID R / W unit ASSY. Also,
 connect the RFID power harness to the FAST I / O AMP PC board.

8 Close the control panel and lock it with the service key.

2-2-3 Installation of instruction panel

1

Loosen the screws (2 places), insert the instruction panel from above, and tighten the screws to fix them.

2-3. Installing the game board

2-3-1 Preparation before installation

caution

Make sure the power switch is off before installing the game board.

1

Open the ejector door and turn off the power switch.

2

Unlock and remove the front door with the service key.

3

Remove the wing bolts (2 places) on the PCB baseboard and pull out the PCB baseboard. Remove the service outlet outlet cover (1 location) according to the game board you are installing.

[Butterfly bolt: M4x25] 2 places / [Flat washer: 4.5x18x1.6t] 2 places

2-3-2 Installation of TAITO Type X

* Only when the optional Burix JVS board is installed

- 1** Fix TAITO Type X to the PCB baseboard with the screws (4 places) attached to this machine.
[Sems screw (W)-(trivalent W): M4x18] 4 places

- 2** Store the PCB baseboard and secure it with wing bolts.
[Butterfly bolt: M4x25] 2 places / [Flat washer: 4.5x18x1.6t] 2 places

- 3** Remove the clamps (2 places) and disconnect the video cable and JVS cable. Connect the power cord that comes with "TAITO Type X" to the service outlet.

- 4** Connect the audio cable supplied with this unit to the audio output terminal (green) of TAITO Type X and the AMP PCB ASSY.

- 5** **3** Connect the power cord and JVS cable connected in step 2 to TAITO Type X. The video cable uses the "DVI → D-SUB" conversion connector that comes with "TAITO Type X". DVI side Please connect to. Secure the video cable with a clamp.

重 要

When connecting a video cable to TAITO Type X, use the conversion connector (DVI → D-SUB) that comes with "TAITO Type X" and connect to DVI.

Conversion connector (DVI → D-SUB)

- 6**

2-3-3 Installation of TAITO Type X 2

* Only when the optional Burix JVS board is installed

- 1** Fix TAITO Type X 2 to the PCB baseboard with the screws (4 places) attached to this machine.
[Sems screw (W)-(trivalent W): M4x18] 4 places

- 2** Store the PCB baseboard and secure it with wing bolts.
[Butterfly bolt: M4x25] 2 places / [Flat washer: 4.5x18x1.6t] 2 places

- 3** Remove the clamps (2 places) and disconnect the video cable and JVS cable. Connect the power cord that comes with "TAITO Type X 2" to the service outlet.

- 4** Connect the audio cable supplied with this unit to the audio output terminal (green) of TAITO Type X 2 and the AMP PCB ASSY.

- 5** **3** Connect the power cord and JVS cable connected in step 2 to TAITO Type X 2. For the video cable, use the "DVI → D-SUB" conversion connector included with "TAITO Type X 2" and connect it to the lower DVI. Secure the video cable with a clamp.

重 要

When connecting a video cable to TAITO Type X 2, use the conversion connector (DVI → D-SUB) that comes with "TAITO Type X 2" to connect to DVI.

Conversion connector
(DVI → D-SUB)

- 6** Install and lock the front door.

■ 2-4. Power plug connection

caution

- Do not let the power cord stick out of the aisle. Players and galleries cause her to stumble.
- Be sure to connect the ground wire to the ground terminal.

1

Remove the power cord that came with the unit from the cash box.

2

Connect the power cord to the power socket on the back of the unit.

3

Secure the power cord with the nylon clamp and fixing screw that came with the unit. Select either the left or right screw hole and fix it depending on the installation situation.

[Truss screw (chrome): M4x8] 1 place

4

..

■ 2-5. Communication cable

caution

- Do not let the communication cable stick out of the passage. Players and galleries cause her to stumble.
- After pulling in the communication cable, close the run cover plate to the width of the cable and fix it.

- 1** Loosen the fixing screws (2 places) on the run cover plate, slide the run cover plate, and pull the communication cable inside. After pulling in, close and secure the run cover plate to the width of the cable.

■ 3-1. Operation check

■ Operation check procedure

To check the operation, follow the procedure below and prepare before operation.

- 1) Turn on the power switch
- 2) Check the coin meter
- 3) Check on the game

1) Turn on the power switch

1

With the game board connected to the chassis, open the ejector door and turn on the power switch.

重 要

If dew condensation occurs on the inside of the LCD monitor glass surface when the power is turned on at the time of initial installation or when the power is turned on without energizing for a long time, the dew condensation can be eliminated by energizing for about 3 hours.

2

Check if the image is displayed on the LCD monitor screen.

2) Check the coin meter

- 1 Insert coins and check if the coin meter works properly. The coin meter can be checked from either the cash box side or the rejector door side. (Check the coin meter with the I / O board and the game board connected.)

- 2 Make sure that the indicated value of the coin meter is added. * Even if you insert a coin when the game board and I / O board are not connected, the coin will be used. The meter reading is not added.

3) Confirmation on the game

- 1 Make sure that the game can proceed normally.

■ 3-2. Function explanation

■ Central control

The central control is inside the ejector door.

① SERVICE SWITCH (service switch)

You can increase your credit without counting the coin meter.

② TEST SWITCH

A switch to activate the test mode.

③ SOUND VOLUME

Adjust the volume output from the speaker. The sound becomes louder in the clockwise direction.

④ Power switch

This is the power switch for this unit.

⑤ LCD monitor regulator

There is a monitor adjuster inside the rejector door. The maintenance man or technician should adjust the LCD monitor.
when.[LCD monitor adjustment → page 58]

■ 3-3. About service outlets

⚠ 注意

The total current capacity of the service outlet of this machine is 4A. Never use a service outlet for equipment with a total maximum current of more than 4A, as it may cause overheating and fire.

■ Location of service outlets

The service outlet is located on the far left inside the front door. When using, remove the concent cover. Also, if you are not using it, install an outlet cover.

重要

The service outlet works with the power switch. When using it, turn on the power switch.

■ 3-4. Replacement of instruction sheet

- 1** Remove the two screws, remove the instruction panel from the machine, and remove and replace the instruction sheet as shown in the figure below.

[Trust screw (chrome) M4x10] 5 places / [Cap nut (chrome) M4] 5 places

■ 3-5. Pasting the instruction sticker sheet

- 1** Please replace the instruction sticker sheet attached to this machine according to the price setting.

3-6. Replacing the display sticker

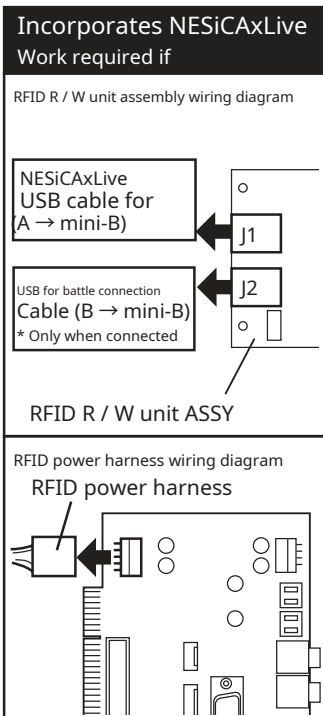

caution

Be sure to turn off the power switch when attaching the display sticker.

1 Open the ejector door with the service key and turn off the power switch.

2 Use the service key to unlock the key on the back of the control panel assembly and open the control panel toward you. Remove the screws (2 places) and remove the control cover (rear).
 [Knurled screw with cross hole: M4x7] 2 places

* If NESiCAXLive is installed, connect the USB cable to the RFID R / W unit.
 Unplug the RFID power harness from the ASSY and the RFID power harness from the FAST I / O AMP PC board.

3 Remove the nuts (2 places) and remove the display card bracket and display card glass. Place the display sticker between the display card bracket and the display card glass.

[Flange nut: M4] 2 places

About maintenance

Maintenance and inspection must be performed by a maintenance man and a technician.

Contents of Chapter 4

■ 4-1. Inspection

Be sure to perform daily inspections.

■ Daily inspection

Please inspect or clean according to the following items before the start of business and at the end of business. Pay particular attention to the areas where the player touches.

■ Inspection items (7 items in total)

① Damaged power cord

- Are there any objects (such as other housings) on the power cord?

② Is the power plug firmly inserted?

- Is the ground wire connected?

③ Presence or absence of appearance damage

- Is the cabinet scratched or dirty?

④ Check the installation space

- Is the housing displaced from the installation position due to looseness of the adjuster? • Is the adjuster all grounded?
- Are the adjuster bolts, caster wheels, etc. damaged? • Are the adjuster hole plugs attached?

⑤ Can each door be locked or unlocked?

- Is the front door distorted?
- Is the ejector door distorted?

⑥ Operation check (whether the game can be played normally)

- Can you hear the sound?
- Are there any abnormalities on each button?

⑦ Do the meters work?

- Does the coin meter work with the game board and I / O board attached?

■ 4-2. Cleaning

4-2-1 Cleaning the LCD monitor

Use a soft cloth such as cotton to wipe off dirt. Gently wipe off any dirt that is difficult to remove with a cloth dampened with a small amount of water. After wiping it off, wipe it again with a dry cloth.

重要

Never use solvents or chemicals (thinner, benzine, wax, alcohol, other polishing cleaners, etc.) as they will damage the housing (painting, resin surface, etc.).

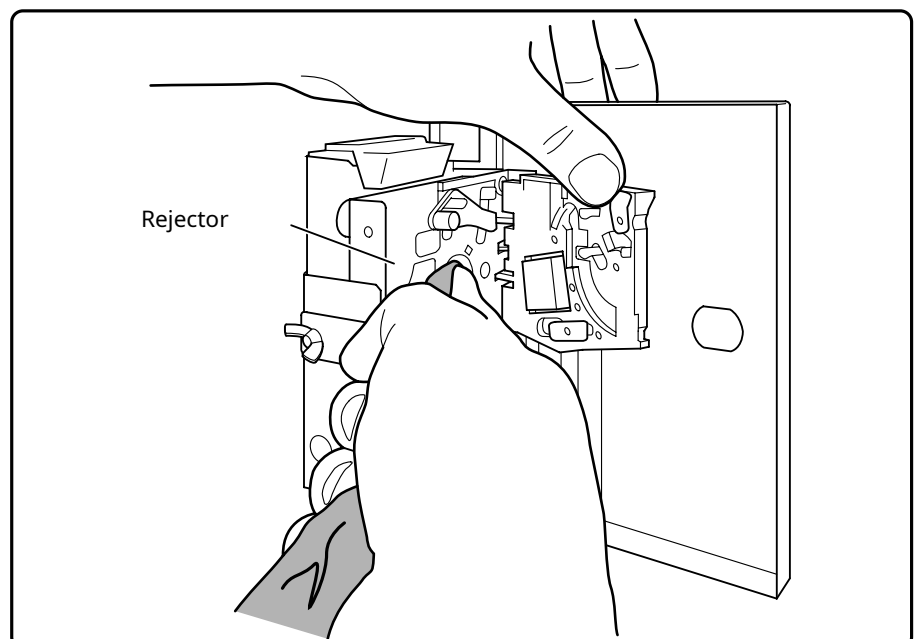

4-2-2 Cleaning the ejector

1

Open the ejector door and turn off the power switch.

2

Open the rejector gate and clean the inside. Soak a soft cloth in a neutral detergent diluted with water, squeeze it tightly, and then wipe off the dirt. After wiping it off, wipe it again with a dry cloth.

■ 4-3. Optional items

■ Alarm device

It is powered by a 9 volt battery to keep it working even when the chassis is powered off. Make sure that the alarm is activated during daily inspections and coin collection.

1 Pull out the cash box and remove the buzzer cover of the alarm device. [Sems screw (S): M3x8] 3 places

2 Remove the batteries and replace them with new ones. Please purchase a commercially available 9 volt battery.

3 Check the operation after replacement. If it is working properly, reattach the buzzer cover. Return the cash box to the chassis.

■ Burix JVS Board

This kit is a kit for operating a JVS compatible game board with a Burix diamond.

■ Burix New JAMMA Power Kit

This kit is a kit for operating a JVS compatible game board with a Burix diamond.

■ TAITO Type X2 Battle Kit

This kit is compatible with the battle game for TAITO Type X2.

■ Burix JAMMA Kit

This kit is a kit for operating the Burix JAMMA compatible game board with the "Burix New JAMMA Power Kit" attached.

With a diamond

■ VL Control Panel 2J14B

This kit is a control panel kit for Burix.

[2 joysticks, 14 buttons]

■ VL 1P-2P connector conversion harness

Used to change the control panel signal to the 2P side when using the "TAITO TypeX2 Battle Kit".

~ Only if you have installed the optional "Buurix New JAMMA Power Kit" ~

4-3-1 Adjustment of switching regulator (power supply board)

- A store maintenance man or a technician should adjust the switching regulator.
- Do not make the output voltage higher than the specified value by adjusting the voltage of the switching regulator. There is a risk of destroying the IC on the game board.
- This work is required only when using the optional Burix new JAMMA power supply kit.

1

Unlock and remove the front door key with the service key.

2

Adjust each volume of the switching regulator. Turn the volume slowly.

Only if you have the "Buurix JVS Board" installed**

~

4-3-2 Installation of JAMMA VIDEO standard (JVS) compatible game board

caution

- This unit does not support the monitor horizontal synchronization frequency of 15.75kHz. Please change to 31kHz in the game board settings and connect.
- When connecting another company's game board, use the special harness specified by the game board manufacturer.
- Burix The current capacity of the power supply board of the new JAMMA power supply kit (option) is DC12V 4A, 5V 10A, 3.3V 12A. Never use a game board that requires more than this value. Failure to do this will cause an unexpected accident.
- When not using the new Burix JAMMA power supply kit (option), disconnect the connector from the new Burix JAMMA power supply kit (option) and bundle the harness with a clamp.
- Depending on the game board, it may not be possible to display properly on the Burix diamond. In order to display normally, you will need to keep the game board, and in some cases, you will need to pay for custom support and adjustment. note that.

1 Secure the game board to the PCB baseboard. For the fixing screw, use the screw that came with the game board to be installed.

2 Store the PCB baseboard and secure it with wing bolts.
[Butterfly bolt: M4x25] 2 places / [Flat washer: 4.5x18x1.6t] 2 places

Power connector connection

3 Remove the power supply board harness that is secured by the clamps (2 places).

4

On the power supply board

3

Connect the A, B7, and B8 connectors (3 locations) of the power supply board harness that you removed in step 1

Connect

Game board connection example

5

When connecting the cable to the game board, refer to the instruction manual that came with the game board. Also, use the audio cable supplied with this unit for the audio cable connected to the AMP PCB ASSY.

■ 4-4. How to remove and replace parts

caveat

- Only store maintenance personnel and technicians can perform the removal work. In addition, never perform any work other than that described in this manual. If you work with non-genuine parts, it will be considered as unauthorized modification. Never modify it. It will be the cause of the failure.
- If you find any damage or malfunction, turn off the power switch of this unit and contact our service department. If the product is operated with damage or malfunction, it may cause a malfunction or accident.

■ Before performing replacement work

Turn off the power switch of this unit before performing replacement work.

Power switch position

The power switch is located inside the rejector door of this unit, at the bottom right.

4-4-1 Control panel replacement

注意

Be sure to turn off the power switch before performing the replacement work.

■ Installation of the control panel for our product "Eaglet 3"

1

Open the ejector door and turn off the power switch. Unlock the control panel with the service key and open it toward you.

2

Disconnect the control panel connectors (2 places). Remove the fixing nuts (8 places) and remove the control panel.

3

Fix the control panel for "Eaglet 3" with the control plate cover L / R (EG3), carriage bolts (6 places) and locknuts (10 places) attached to this unit. [Carriage bolt (chrome): M4X16] 6 places [Locknut (trivalent): M4] 10 places

- 4 Connect the J / K connector, close the control panel, and lock with the service key.

■ Installation of NAOMI CABINET, NET CITY, VERSUS CITY compatible control panel

- 1 Unlock the control panel with the service key and open it toward you.
- 2 Disconnect the control panel connectors (2 places). Remove the fixing nuts (8 places) and remove the control panel.

- 3** Fix the control panel to be replaced with the control plate cover L / R (SG), carriage bolts (6 places) and locknuts (10 places) attached to this unit.
 [Carriage bolt (chrome): M4X16] 6 places [Locknut (trivalent): M4] 10 places

- 4** Connect the S panel harness that comes with this unit between the control panel and this unit, and connect it to each connector.

- 5** Close the control panel and lock with the service key.

4-4-2 Replacing the joystick and push button

⚠ 注意

Be sure to turn off the power switch before performing the replacement work.

■ Replacement of each button

- 1** Open the ejector door and turn off the power switch.
- 2** Unlock the control panel with the service key and open it toward you.
- 3** From the back of the control panel, remove the terminal of the push button to be replaced, and pull it up while pressing the claw on the side of the push button.
- 4** If you change the number of push buttons, insert the button cover that comes with this unit.

■ Replacing the joystick

- 1** Open the ejector door and turn off the power switch.
- 2** Unlock the control panel with the service key and open it toward you.
- 3** From the back of the control panel, disconnect the joystick connector (one place).
- 4** Remove the E-ring on the shaft and remove each part.
- 5** Remove the fixing nuts (4 places) on the joystick bracket. [Locknut U (trivalent): M4] 4 places
- 6** Remove and remove the screws and nuts (2 places each) that secure the joystick. [Sems screw (W)-(trivalent): M4x15] 2 places [Locknut U (trivalent): M4] 2 places

4-4-3 Replacing the rejector

Be sure to turn off the power switch before performing the replacement work.

- 1** Open the ejector door and turn off the power switch.
- 2** Remove the wing bolt and remove the ejector plate.
Remove the ejector while tilting it sideways.
[Butterfly bolt (trivalent): M4x10] 1 place

- 3** When fitting the ejector, push the lever in the direction of the arrow to fit it.

4-4-4 Replacement of various boards

Be sure to turn off the power switch before performing the replacement work.

■ Replacing the AMP PCB ASSY

1

Open the ejector door, turn off the power switch, and unplug the power plug from the outlet.

2

Remove the back door (lower), remove the connectors (3 places) and nuts (4 places) connected to the AMP PCB ASSY, and remove the AMP PCB ASSY.

[Flange nut (trivalent): M3] 4 places

[Plastic spacer: 3.2x7x10] 4 places

-Only when the optional "Buurix JVS Board" is installed-

Be sure to turn off the power switch before performing replacement work. Please.

■ Replacing the JVS PCB ASSY

- 1** Open the ejector door and turn off the power switch.
- 2** Open the control panel toward you with the service key. Remove the screws (2 places) and remove the control cover (rear).

- 3** Remove the connectors (3 places), JVS cable, and wing nut, and remove the JVS PCB ASSY together with the JVS PCB base. [Bing nut (trivalent: M3) 1 place
- 4** Remove the JVS PCB ASSY from the JVS PCB base. [Sems screw (W)-(trivalent): M3x8] 4 places

4-4-5 Fuse replacement

Be sure to turn off the power switch and unplug the power plug from the outlet before performing the replacement work.

1

Open the ejector door, turn off the power switch, and unplug the power plug from the outlet.

2

Remove the fuse cover at the bottom left of the back of the machine with a screwdriver (+), remove the fuse, and replace it.

■ 4-5. Adjusting the LCD monitor

4-5-1 About adjustment of LCD monitor

The screen adjustment of the LCD monitor is performed by the adjuster inside the ejector door.

Supported RGB signal timing

MODE	Dclk (MHz)	fH (kHz)	fV (Hz)
1920x1080	148.50	67.500	60.000

800x480 (W-VGA)	29.55	29.788	59.577
640x480 (VGA)	25.18	31.475	59.952

■ About AUTO ADJUST

Press AUTO to display the AUTO ADJUST start confirmation screen. Press "ENTER" to do AUTO ADJUST, or "EXIT" to not do it.

* AUTO ADJUST is performed by "Cross Hatch" in the test mode of the game board.
 Please.

4-5-2 How to adjust the LCD monitor

- 1** Press the MENU button to display the menu screen.

- 2** Use the + and - buttons to select, increase or decrease the value, and the ENTER button to confirm. Press the EXIT button to exit the item.

重 要

The LCD monitor is best adjusted at the factory. If you change the adjustment value unnecessarily, it may not be displayed correctly.

4-6. Rotation of LCD monitor

⚠ 注意

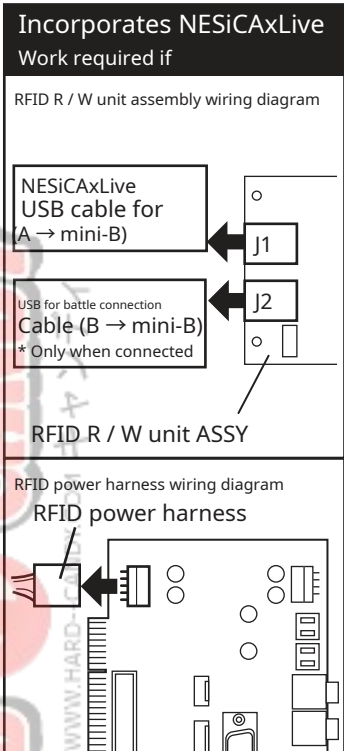

- Before rotating the LCD monitor, be sure to turn off the power switch and unplug the power plug from the concentric.
- When rotating the LCD monitor, use two or more people. Failure to do this will cause the LCD monitor to fall, resulting in damage or injury.

1 Open the ejector door, turn off the power switch, and unplug the power plug from the outlet.

2 Open the control panel toward you with the service key. Remove the screws (2 places) and remove the control cover (rear). * If NESiCAXLive is installed, connect the USB cable to the RFID R / W unit.

Remove it from the ASSY and store it in the hole of the control panel assembly. Also, remove the RFID power harness from the FAST I / O AMP PC board.

- 3** Disconnect the connectors (2 places) connected inside the control panel assembly and the LAN cable or JVS cable. Remove the harness from the clamp and store it in the hole. * The optional Burix JVS board or NESiCAXLive is installed.
If not, this is not necessary.

- 4** Remove the front side (2 places) of the control panel assembly fixing bolts and loosen the rear side (2 places). Push the control panel assembly to the back and remove it up.
[Sems Upset Bolt (W) Trivalent: M6x20]

- 5** Remove the screws (2 places) and remove the back door (upper). Disconnect the monitor cable, electron microscope harness, and connector that are connected internally, and pull it out.
 [Trust screw (chrome) : M4x8] 2 places

- 6** Remove the top side cover L / R, and remove the side cover ASSY L / R. Top side cover [Trust screw (chrome): M4x35] 2 places Side cover ASSY upper side [Sems screw (W) trivalent: M4x6] 2 places Side cover ASSY lower side [Bind low head screw (stainless steel): M4x6] 2 places

- 7** Remove the screws (3 places) and remove the front stopper (upper). [Truss screw (trivalent black): M4x8] 3 places

- 8** Loosen the upper speaker fixing screws (2 places each), slide the speaker up, and tighten the fixing screws.

⚠️ 注意

Be sure to have two or more people remove the LCD monitor.

9

Remove the bolts (4 places) on the back, and be sure to remove the LCD monitor with two or more people. [Sems upset screw (W) trivalent: M6x10] 4 places

10

Remove the screws (3 places) and remove the front stopper (lower). [Truss screw (trivalent black): M4x8] 3 places

- 11** Remove the wing bolts (4 places each) and remove the space plate base. [Butterfly bolt (trivalent): M4x16] 4 places each

- 12** Attach the space plate base with wing bolts as shown. After installation, loosen the screws on the upper speaker, lower the speaker, and fully tighten it. [Butterfly bolt (trivalent): M4x16] 4 places each

⚠ 注意

Be sure to have two or more people install the LCD monitor.

- 13** Two people have an LCD monitor, Connector connection facing down Place it towards. Fix with bolts (4 places).
[Sems upset screw (W) trivalent: M6x10] 4 places

- 14** Attach the front stopper (lower) with the screws (3 places). [Truss screw (trivalent black): M4x8] 3 places

- 15** Install the side cover ASSY L / R and the top side cover L / R. Side cover assembly upper side [Sems screw (W) trivalent: M4x6] 2 places Side cover assembly lower side [Bind low head screw (stainless steel): M4x6] 2 places Top side cover [Truss screw (chrome): M4x35] 2 places

- 16** Remove the screws (3 places) and attach the front stopper (upper). [Truss screw (trivalent black): M4x8] 3 places

- 17** Connect the accessory AC joint harness to the power harness connected to the LCD monitor.

- 18** Connect the monitor cable, connector, and AC joint harness connected to the power supply harness to the LCD monitor. Please install the back door (upper).

[Trust screw (chrome) : M4x8] 2 places

4-7. Fixing the control panel assembly

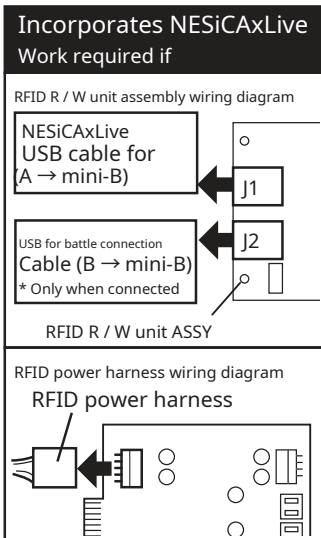

注意

When re-transporting the machine, be sure to fix the control panel assembly with the shipping bracket. Failure to do this may cause an unexpected accident.

1 Open the ejector door and turn off the power switch.

2 Open the control panel toward you with the service key. Remove the screws (2 places) and remove the control cover (rear). * If NESiCAXLive is installed, use the RFID R / W unit ASSY to USB.

Unplug the cable and store it in the hole in the control panel assembly. Also, remove the RFID power harness from the FAST I / O AMP board.

3 Remove each connector (P4 / C) and JVS cable or LAN cable, and store them in the holes.

- 4** Remove the bolts (2 places) on the front side that fix the control panel assembly, and loosen the bolts (2 places) on the back side. Slide the control panel assembly to the back and remove it. Remove the bolts (2 places) left on the machine.

- 5** Attach the shipping bracket to this machine.
[Sems Upset Bolt (W) Trivalent: M6x20] 4 places

- 6** Insert the bolts (2 places) on the back side of the control panel assembly. After that, temporarily tighten the bolts (fix two bolts). [Sems Upset Bolt (W) Trivalent: M6x20] 4 places

Chapter 5 Disposal

■ 5-1. Disposal

When disposing of the housing or parts, the owner of this machine is responsible for handling it as industrial waste.

Packing material

At the time of shipment, this machine is protected by packing materials.

Please dispose of the packing materials according to the sorting method according to the area.

Replacement parts

Dispose of items that are no longer needed after replacing parts using a sorting method that suits the area.

F9008240A	ASHTRAY STOPPER-(DARK BLUE)	ABS	resin
F9008241A	COIN ENTRY MOLDING-(ROHS)	ABS / brass	Resin / metal
F9008242A	CONTROL SIDE COVER-L-(DARK BLUE)	ABS	resin
F9008243A	CONTROL SIDE COVER-R-(DARK BLUE)	ABS	resin
F9008244A	EXTRA SPACE COVER-L- (DARK BLUE)	ABS / brass	Resin / metal
F9008245A	EXTRA SPACE COVER-R- (DARK BLUE)	ABS / brass	Resin / metal
F9008246B	LCD SPACER PLATE-L	ABS	resin
F9008247B	LCD SPACER PLATE-S	ABS	resin
F9008248A	RUBBER PLATE	Natural rubber	Rubber
F9008249A	RUBBER PLATE	Natural rubber	Rubber
F9008250B	RUBBER PLATE	Natural rubber	Rubber
F9008251B	RUBBER PLATE	Natural rubber	Rubber
F9008252A	SIDE COVER LOWER-L- (BLUE)	ABS	resin
F9008253A	SIDE COVER LOWER-R- (BLUE)	ABS	resin
F9008254A	SIDE COVER-L- (BLUE)	ABS	resin
F9008255A	SIDE COVER-R- (BLUE)	ABS	resin
F9008256A	TOP COVER-(FRONT)-(BLUE)	ABS	resin
F9008257A	TOP COVER-(REAR)-(WHITE)	ABS	resin
F9008264A	HOLE PLUGS- (TAKIGEN)	PA	resin
G1002087A	PATENT STICKER	SS Fujinamer	resin
G1002088A	VOLTAGE WARNING STICKER	PVC	resin
G1002095A	JAMMA STANDARD STICKER	PVC	resin
G1002173A	CAUTION STICKER- (light stimulation)	PVC	resin
G1002673A	CABINET STICKER SHEET-(VEWLIX 4)	High-quality paper	paper

part number	Part name	Material	Classification
G1501787A	CONNECTOR STICKER SHEET-(TYPE RA)	High-quality paper	paper
G1504540A	SIDE STICKER SHEET	PVC	resin
G4500463A	TITLE PANEL	PMMA	resin
G5500517A	CONTROL STICKER-(1J7B)	PVC	resin
G6000373A	INDICATION STICKER SHEET	PVC	resin
H1005095A	LCD GLASS- (WITH AG COATING)	Tempered glass	Glass
H1005097A	DISPLAY CARD GLASS	Tempered glass	Glass
H4003138A	PACKING SHEET	polyethylene	resin
H4003139A	PARTITION-(BACK)	Cardboard / EPE	Paper / resin
H4003141A	PARTITION-(FRONT)	Cardboard / EPE	Paper / resin
H4003152A	PACKING BAG	polyethylene	resin
H9000792A	PETTEPLE	Steel / sponge	Metal / resin
